Hensley-Pine Mountain WMA Information:

The 6,000-acre Hensley-Pine Mountain WMA lies along the narrow crest and south-eastern-facing slope of Pine Mountain in southeastern Letcher County. The area is entirely forested with extremely rugged, steep terrain and many high cliffs. Elevations range from 1,400 to 3,897 feet above sea level. Good to moderate populations of black bear, deer, turkey, grouse, squirrel, furbearers and songbirds exist on the area. Unique habitats, such as mountain bogs and sandstone glades exist on the WMA. Several man-made waterholes provide habitat for many reptiles and amphibians. No camping or horseback riding is allowed on the WMA. The area is open under statewide regulations for all game species. See the Fall Hunting and Trapping Guide for additional information concerning hunting seasons.
